

af-x fireblocker

Genpower, supplier of temporary and permanent high-quality power supply units integrates AF-X Fireblocker extinguishing systems

Genpower can supply the right unit for any application that requires a temporary or permanent high-quality power supply. They carry a wide range of generators and offer excellent 24/7 service. Guaranteeing this service choosing the partners is crucial.

The gen-set build in a 20ft container having a volume of 36 m³ is been used for offshore power management. The system consists of only 1 AF-X Fireblocker BM. The BM has is capable of extinguishing 40 m³ by itself.

As offshore regulations demands the AF-X Fireblocker has been equipped with a manual activation. After the renting period Genpower can add detection very easily and transform the systems to automatic and rent the system for land applications. If the system is needed in another Generator the whole system is easy to re(move) and install elsewhere.

Compared to other system often bigger and more complex, the AF-X Fireblockers offers a quick installation and easy to fit in existing spaces.

Prevent fire with AF-X Fireblocker.

Fire causes enormous damage. Most fires develop from a short circuit in, or overtaxing of engines or equipment. Unseen. Unnoticed. Undiscovered until late, and more often than not even far too late. AF-X Fireblocker is one of the few systems that operate from within and blocks the fire directly at the spot that until now could not be protected: right at the seat of the fire.

Built-in fireman

Originally developed for space travel, AF-X Fireblocker serves as a built-in fireman and swiftly blocks the fire with a dry aerosol compound. From the very first spark. Without using water. Completely harmless to man, beast and the environment and with no threat to business continuity. Low purchasing costs, low installation costs and low maintenance costs. No need for constructional provisions. Long life. No consequential loss. In other words: an annual cost saving of many, many euros.
